

GREENTEK

Capability Statement

Overview

Greentek provides comprehensive vegetation management services to utility and government clients. In our commitment to safety and quality, Greentek complies with CalOSHA and ANSI standards and maintains an excellent EMR rating. We have successfully performed projects in this market valued at more than \$450 million and have concurrently managed approximately 500 employees and many subcontractors. As a woman-owned business, we serve as a diversity vendor, offering adaptable and innovative solutions to disaster response, line clearance, storm cleanup, fire hardening, tree removal, and other industry challenges. Additionally, Greentek has maintained high-functioning professional relationships with key industry stakeholders, including the US Forest Service, Cal Fire, and Pacific Gas & Electric Company (PG&E).

Areas of Expertise

Line Clearance – Trained and certified to work safely around power lines, our crews are experienced in clearing distribution and transmission lines.

Post-Fire Hazard Tree Removal – After fires, trees pose an extreme threat. Our crews have managed large scale tree removal on fire clean-up projects throughout northern California.

Defensible Space – We can create a buffer between buildings on your property and the surrounding grass, trees, shrubs, or wildland area.

Tree Removal & Pruning – We handle routine removals as well as those that require the highly technical skills necessary for working around utility lines or using large cranes.

Storm Restoration & Debris Removal – Skilled in clearing lines safely and according to specifications, our crews work efficiently and safely to restore areas affected by storms or fires.
