GREENTEK

CAPABILITY STATEMENT

Ready-Mix Aggregate Supply & Production
West Monroe, Louisiana

OVERVIEW

Greentek Resources is an aggregate producer supplying washed concrete sand and supplemental aggregates to ready-mix concrete producers and construction partners. Our Rogers Road operation in West Monroe, Louisiana is supported by verified subsurface testing, controlled processing, and scalable production capacity designed to support consistent batching operations.

PRIMARY PRODUCTS

Washed Concrete Sand
- Produced to meet ASTM C33 gradation requirements
- Clean, washed material with controlled fines
- Suitable for ready-mix concrete, precast, and structural applications
- Testing and certification available for DOT and project submittals

Washed Construction / Utility Sand
- Uniformly graded for batching, drainage, and infrastructure applications

General Fill Sand & Supplemental Gravel
- Available for yard use, site work, and base applications
- Gravel and oversize aggregate recovered in select zones
- Availability subject to production sequencing

PRODUCTION CAPACITY

- **Base commercial production:** approximately 15,000 tons per week
- **Expanded production capacity:** up to 25,000 tons per week
- **Production planned using sustained output rates to ensure reliable supply**

QUALITY CONTROL & COMPLIANCE

- Bore-tested subsurface deposit
- Washed and screened processing
- Separate stockpiles maintained to preserve gradation consistency
- ASTM and AASHTO standards supported
- Gradation reports and compliance documentation available

AVAILABILITY & SUPPLY

- Spot loads, project allocations, and contract supply available
- Dedicated tonnage commitments available by agreement to support plant and project demand
- Capacity scalable to support phased construction schedules and peak demand periods
